

## Installing the Cartridge Adapter

Using the Cartridge Adapter (560546) is necessary if your cartridge does not have internal threading that matches the many nozzles and cartridge accessories that Fisnar offers. To ensure the best fit of this adapter with your cartridge please follow the step-by-step instructions below.

- 1 Cut off nozzle from cartridge at approximately 0.4 inches away from cartridge base.

- 2 Insert the enclosed O-ring on the end of the nozzle.

- 3 Insert the Cartridge Adapter (560546) against the end of the nozzle. Then insert the cartridge with adapter into a Fisnar cartridge retainer.
